EMPLOYMENT HISTORY

EDUCATION

Jul 2017 — Apr 2020 BSc Electronics , Awh special collage kozhikode

SKILLS	node js	Experienced	CSS3	Experienced
	Express js	Experienced	JavaScript	Experienced
	React js	Experienced	Error Searching	Expert
	Mongodb	Experienced	Git	Skillful
	HTML	Expert		

PROJECTS

Food delivery

I successfully build a website, the "crossroads multi vendor food delivery system" . in this project I implement more features such as multi-vendor order managing, sales managing, order managing. for this project, I use the technologies Node.js as Server side language, express.js framework, MongoDB as database, and the hbs as the template engine and so on

the features of the my project

User-side :

all e-commerce features such as view products, add the product to cart and order the cart items and manage the order, and also Online payment option

(Razorpay), and SMS login system (using twillo api)

admin :

manage vendors and view the sales report and much more

vendor:

manage products and view the sales report and much more

gitrepo: <https://github.com/abhinavkallungal/crossroadsfooddelivery>

Open source contribution

Queue App

its an open-source Application for the queue management system . contributed to the project frontend side

in this project I used the react.js

repo:<https://github.com/CrossroadsAcademy/queue-user-frontend>

Kaizen coworkers

it is my new freelance work and the project are in planning stage

it's a dynamic website with some registration facilities and managing

Figma design :
